ISRAEL

You're Destination for Cyber Security Innovation

The IEICI's Cyber Security Sector - Since the creation of the internet and cyber space, Israeli security experts and engineers have been fighting ,at the forefront of cyber defence against cybercrime. Israel's cyber security industry develops a wide range of cutting edge and creative solutions for the constant increasing threat in the cybernetic field. The IEICI's Cyber Security Sector represents over 250 companies in the cyber security arena. Israeli Cyber Security companies offer technologically advanced and field-proven products, which are amongst the most innovative solutions. The sector successfully partnered with key players worldwide and is cooperating with foreign governmental ministries, agencies, as well as industry entities in order to promote private-industry joint ventures and international .partnerships with Israeli cyber security companies.

The Israel Export & International Cooperation Institute, supported by member firms, private-sector bodies and the government of Israel, advances business relationships between Israeli exporters and overseas businesses and organizations. By providing a wide range of export-oriented services to Israeli companies and complementary services to the international business community, the Institute helps build successful joint ventures, strategic alliances and trade partnerships around the world.

The Foreign Trade Administration at the Ministry of Economy is responsible for managing and directing the international trade policy of the State of Israel. The main fields of activity include activities for the promotion of trade and export, attracting and encouraging foreign investments and creating strategic cooperation with foreign companies. The Administration operates a network of economic representatives who constitute the operational arm of the Ministry in the markets abroad.

Nucleon

Website: www.nucleon.sh

Company Description:

Founded at 2016, Nucleon specializes in collecting and analyzing the most dangerous current threats on the internet, providing accurate intelligence to organizations.

Founded by experts in the information security field, Nucleon brings focused targeted cyber intelligence to sensitive networks by using patent pending innovative technology to identify and learn about threats without human intervention. Using Nucleon, an organization now can defend against the most dangerous attacks on the internet.

Using innovative tools, Nucleon is able to estimate and alert the impact of DDoS attacks around the world. Nucleon is able to dynamically track and monitor existing and new botnets as they are found.

Nucleon is adding a new dimension of information security by providing existing security tools such as firewalls, siems and others with intelligence relevant to their sector.

Nucleon is collecting its data from its own unique sources that are using polymorphic sensors technology to deliver accurate results.

Verint Systems

Website: <http://www.verint.com/>

Company Description:

Verint, the global leader in Actionable Intelligence® solutions, is transforming the way organizations combat advanced cyber threats. Verint Threat Protection System is the first unified, intelligence-driven platform that detects breaches across the attack chain and automates the complex work of incident investigation. Much like a human analyst, Verint Threat Protection System collects leads, reviews evidence, and uncovers attacks. Through the power of automation, it analyzes thousands of leads per day, providing analysts with clear, visual, incident storylines that slash dwell time and make security operations vastly more efficient.
